# Environment Checker - Quick information guide

## FAQ

1. How is the tool accessed?
  - a. <http://env.dev.ameren.com/Reservations/View>
2. What happens if the tool breaks?
  - a. Reservation back up will be taken weekly
3. If an environment is already reserved during a needed timeframe what should the project liaison do?
  - a. Schedule reservation in tool and follow up with concerns at the weekly status meeting in order to start remediation process.
4. What if my application or environment isn't listed
  - a. Contact @IT DEV SARP to have it added to the tool
5. What if the database isn't listed?
  - a. Select "New Item" from the drop down and enter database to be used

### **Reservation Tool Guidelines**

- Liaison should reserve environment(s) for anticipated testing as soon as possible
- If it is determined that reservation is no longer needed, liaison should update tool immediately
- Entry for "Reason" textbox during reservation
  - Include time of day in which environment will be used
  - Include project that is being tested
  - Include ID that is being used for environment
  - Example: Digital Outage 7 am – 3 pm (csfina06)
- Liaison should only edit/remove reservations that were created by them
-
